• About Azarestan

Founder's message

It is an honor that Azarestan Group has played a role in the development of our beloved country, Iran, by participating in **over 400 projects over the past four decades**. We believe that integrity in work and fostering appropriate interactions with clients and stakeholders are the key to a company's sustainability and progress. Therefore, we strive to fully understand their needs and assist them in achieving their goals and success in their endeavors. We are also committed to creating value beyond the expectations of our clients through extra effort and a sincere approach that aligns with our beliefs.

In most of these projects, we have taken on the role of the contractor, and in my view, the most crucial aspect for anyone entering into a contract is to uphold **honesty** and **commitment** in their work. A contract sustained by integrity and dedication endures, and our professional experience shows that with commitment, we have moved forward even in the toughest times.

Another principle we firmly believe in within our organization is fulfilling **social responsibilities**. From our perspective, the development and progress of society depend on nurturing the next generation—the children who will steer the wheels of society tomorrow. If today's children are not given the opportunity to grow and thrive, we cannot envision a bright future for society. Building such a future requires everyone's participation, each contributing their part. We believe that lighting a candle is more effective than cursing the darkness!

Tohid Zoorchang

AZARESTAN

Azarestan Group was established in May 2018, born from the 30 years of experience of its managers and founders in the "Omran Azarestan" company. The synergy of accumulated knowledge and resources over the years, combined with the goal of development and investment in the construction industry and related sectors, necessitated the formation of a comprehensive and integrated organization. The group, which operates as a private joint-stock company, consists of five companies:

- **"Omran Azarestan"** : Specializing in construction contracting.
- **"Sazvar Sazeh Azarestan"** : Focused on the production of structures and metal equipment in urban and industrial projects.
- **"Baspar Pey Iranian"** : Offering design and execution services in geotechnical engineering for industrial and urban projects.
- **"Rooja Tejarat Azarestan"** : Engaged in trade, production, and distribution of architectural and interior decoration products.
- **"Emarat Pishgam Azarestan"** : Involved in project development and ownership in residential, office, and commercial sectors.

"Azarestan's" self-sufficiency in the necessary dimensions for mega-projects is the result of a broad chain of value-creating elements, including:

- The credibility built over years of operation.
- A community of selected elites and industry specialists.
- Experience in managing the processes of design, engineering, transfer, and implementation of technology.
- Ownership of a unique and up-to-date set of technical equipment, technology, and machinery.

This intelligent and synergistic network has established:

- "**Commitment to Excellence**"
- "**Extensive Knowledge Based on Experience**"
- "**A Broad Value Chain**"
- "**Proficient in Completing**"

as the four main advantages of the "Azarestan" brand in the industry.

Mission

Azarestan Group is a holding company engaged in development and investment in the construction industry and its related sectors. Through smart investments in value chain businesses and adjacent areas, the group aims to create value. By participating and making strategic investments in synergistic and attractive segments of the construction industry's value chain in Iran and neighboring countries, the group seeks to create sustainable value and global-standard development for both the public and private sectors. Azarestan Group strives to be a leader and an effective force in sustainable development and economic progress in the country.

Values

Commitment: Loyalty to our promises and dedication to fulfilling our commitments to stakeholders.

Ethics: Adherence to honesty and fairness.

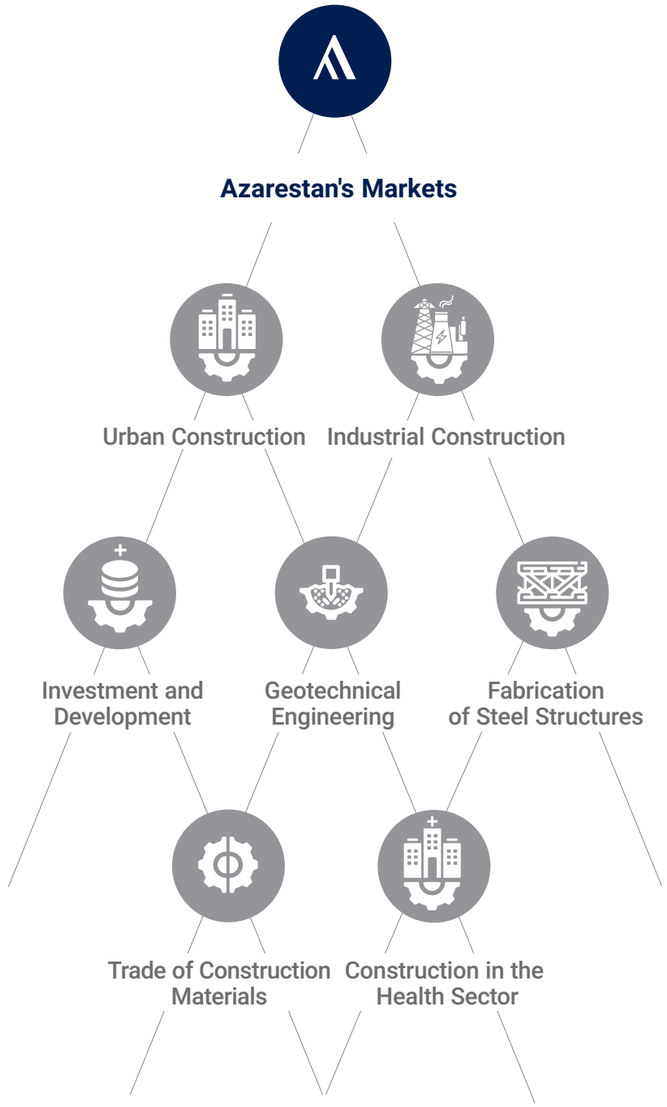

Quality: Delivering optimal quality to ensure the organization's reputation.

Interaction: Building long-term relationships based on respect with all stakeholders.

People: Committed to improving the welfare and quality of life, especially in project areas, by involving local people, protecting the environment, and respecting local cultures.

Health: Striving to maintain the health of employees and ensuring a safe and healthy work environment.

• Busher Foundation Stabilization Project

Quality in construction begins with the right equipment. Precision tools, modern technology, and ready access to the right machinery directly impact both quality and project timelines. That's why Azarestan owns its technology outright. In an environment where equipment availability is unpredictable, relying on rentals or imports creates a gap between vision and execution. We eliminate that gap. Our proprietary fleet includes specialized machinery and technical equipment, backed by a comprehensive operation and maintenance organization and efficient logistics network, ensuring we have what we need, when we need it.Yet our greatest asset is not hardware. It is the accumulated expertise of our people—the technical knowledge and operational experience that transforms equipment into execution. Together, they form a complete operational chain: software and hardware, seamlessly integrated.

Construction is fragmented. Azarestan is not.

• Facade Execution
• Finishing Work

What sets **Azarestan** apart is a complete, end-to-end operational chain; where every subsidiary is a market leader in its own right, yet works in seamless coordination with the rest of the group.
This is the power of the Azarestan family: individual excellence, amplified by collective strength.

Baspar Pey Iranian, was established in April 2008 by a group of graduates from the Faculty of Engineering at the University of Tehran, based on the initial idea of creating a specialized entity in the field of geotechnical engineering contracting. The foundation and philosophy behind Baspar Pey Iranian have led the company to play a significant role in studies, design, quality control and assurance, procurement and support, material supply, management, and execution of top-tier geotechnical engineering projects.

RELIABLE PROFESSIONAL INNOVATIVE

Since its inception, Baspar Pey Iranian has advanced professionally by relying on cutting-edge technical knowledge and modern technologies in the engineering field, utilizing up-to-date machinery and specialized equipment.

- Equipment and machinery with the latest technology
- Utilization of young and specialized professionals
- Unique solutions for each project
- Over **300** skilled and expert personnel

Areas of Activity:

ROOJA TEJARAT AZARESTAN Co.

Rooja Tejarat Azarestan was founded in 2010 with a clear entrepreneurial vision: to fill a critical void in Iran's market by introducing world-class architectural design and premium quality materials to the country's most ambitious projects.
Rooja pioneered this journey as an exclusive curator, bringing innovative Italian and Spanish interior brands to Iran's premier developments. Over the past decade, we have supplied and delivered products from renowned international brands—known for their unique designs and exceptional quality—to some of the country's most prominent construction projects.

Today, Rooja has evolved into a dynamic partner for construction finishing and FF&E, offering a thoughtfully curated portfolio of tile, ceramic, porcelain slabs, decorative lighting, and furnishings. This spirit of innovation has also led us to launch our own brand, Merito Ceramica—premium, large-format porcelain slabs designed in collaboration with leading Italian companies and produced domestically to European standards.

Rooja Tejarat Azarestan exists to transform spaces into living art, providing the materials and inspiration for extraordinary environments. Because we believe in the good feeling of living in an art collection.

MERITO ceramica

Merito Porcelain Ceramic is manufactured in Iran using designs developed by leading Italian companies and in accordance with the latest European quality standards. It is offered to discerning customers who seek nothing but the very best.

The Samanfaraz Office Towers, recognized as the tallest office building in Iran (192.71 meters from street level to the top of the helipad), is located in District 6 of Tehran, at the southwest corner of the intersection of Hakim Highway and Sheikh Bahaei Street. After the stabilization and excavation operations commenced by Baspar Pey Iranian in 2016,Omran Azarestan began work on the project's foundation and concrete structure towards the end of 2017.

A notable feature of this project is the production of Self-Compacting concrete (SCC) with a compressive strength of C50 and a volume of 130,000 cubic meters.

Self-Compacting concrete (SCC) is defined as concrete that has an ability to flow under its own weight, to fill the required space or formwork completely and to produce a dense and adequately homogenous material without a need for vibrating compaction.

For the first time, a concrete production plant (tower batching plant) was installed within the excavation site (30 meters below ground level), and vertical storage silos for aggregates and cement were allocated. This setup enabled the production of 120 cubic meters of self-compacting concrete (SCC) with a C50 strength rating per hour.

In 2024, under a new contract, Omran Azarestan will also handle the project's finishing phases, including facade, mechanical installations, electronic systems, and architectural works.

• Investment and Development

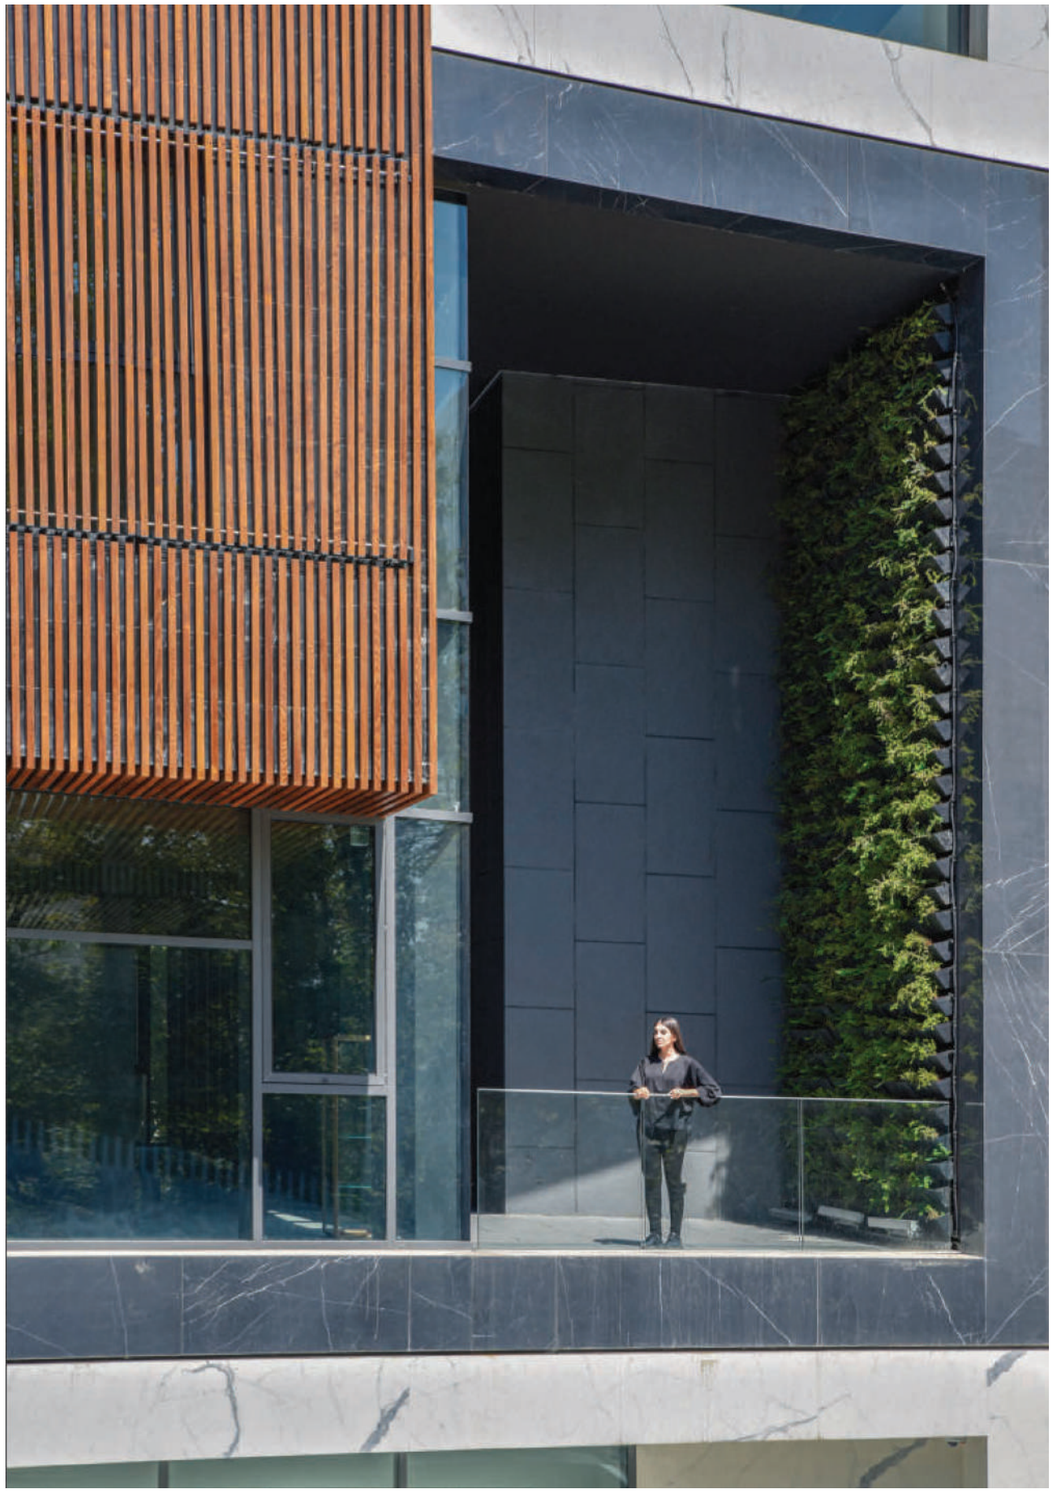

The **financial strength** and **credit** earned through decades of sustainable growth, combined with ownership of key elements across the operational chain, have positioned Azarestan Group to make Investment and Development in the construction industry and related sectors its primary business objective, both in Iran and neighboring markets.
Over 35 years of construction experience have built a deep repository of technical, operational, and ethical expertise, ensuring quality at every level of our operations. Project management discipline within this structured quality system has matured our execution processes to the point where we now deliver under "Azarestan Standards", a benchmark of quality assurance that clients can trust.

Building on these assets, and recognizing the need to elevate urban living standards, Azarestan has targeted investment in benchmark residential, office, and commercial developments.

At the same time, our technological, equipment, and logistical capabilities position us as one of the few major players in Iran's industrial and mining sectors. Through a smart network of knowledge and assets, we identify, evaluate, and invest in collaborative opportunities; transforming promising ideas into successful ventures.

Sustainable value creation and world class project execution define Azarestan's commitment to the public and private clients, and to the communities we serve.

Terms such as "settled human" or "urban human" in the history of civilization indicate that one of the primary measures of human existence is residence.
Therefore, the quality of living spaces is a determinant of lifestyle.
Human interactions and exchanges in a civil society also require habitation and concentration, which gives rise to definitions such as office or commercial spaces.

Consequently, luxury living is defined by a product combining:

- **"Quality of Location"**
- **"Quality of Interaction"**
- **"Quality of Service"**

With the aim of enhancing lifestyle, Azarestan has incorporated a mix of:

- **Investment**
- **Construction**
- **Services**

In its business portfolio concerning luxury projects.

Notable examples include the operational project "Kafi-Abadi" and the ongoing projects "Raman", "Narenjestan", and "Farmanieh".

Azarestan views "social responsibility" not just as a moral obligation but as an organizational duty.

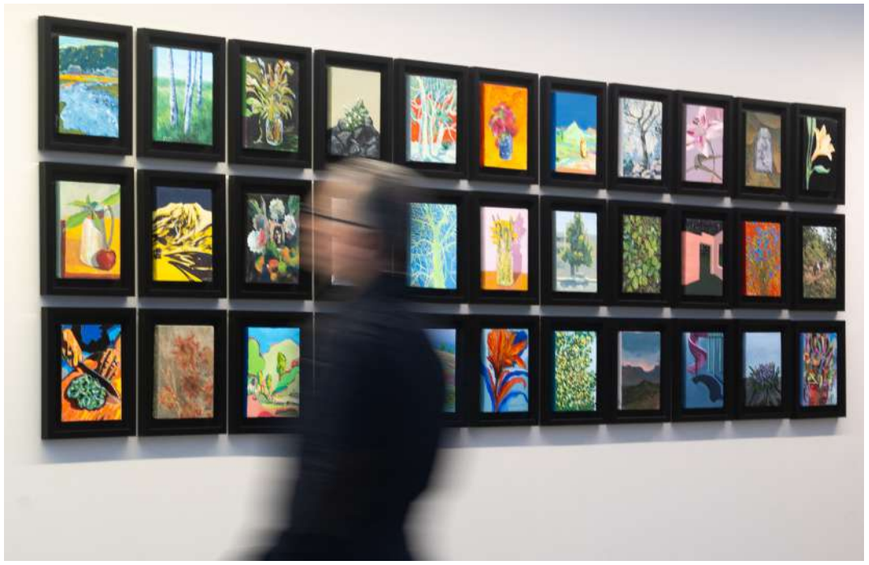

Since every business is rooted in a social context, strengthening this foundation and enhancing the surrounding community ensures the sustainability of "Trade." Accordingly, children, as the cornerstone of society, have always been a top priority in Azarestan's social and humanitarian responsibilities.

Key initiatives include:

- Support for the "Children's Foundation"
- Support for the "Iranak Childhood Museum"
- Support for the "Institute for Research on Children's Literature"
- Establishment of the "Sadr al-Wa'izin Khansar" children's library and provision of services to surrounding villages
- Setting up a library at the "Sazvar Sazeh Azarestan" factory and supplying books to local school libraries
- Construction of a girls' high school in Bushehr Province
- Donation of mobile classrooms to the education sector in Jiroft
- Support for employment and entrepreneurship and enhancing the academic level of young specialists in the country
- Providing financial and in-kind aid to earthquake-affected areas in Kermanshah, East Azerbaijan, and Ardabil
- Construction of a CT scan building at the Gharchak Hospital in Varamin
- Official sponsor of the Iranian National Rowing Team in international competitions

• Sadr al-Wa'ezin Khansar Library

Azarestan Group has always been committed to supporting emerging and lesser-known talents. Accordingly, the group, in collaboration with Artunity, has taken significant steps to foster and preserve contemporary Iranian art.

Through this partnership, every year more than a thousand artworks are created for Azarestan, under the supervision and curatorship of Artunity, with the participation of a diverse group of young and talented Iranian painters. Each piece reflects the unique perspective, emotion, and authenticity of its creator.

Artunity, with a careful and responsible approach, provides a platform for lesser-known talents to flourish, while ensuring that authenticity — a core value of Azarestan — is present in every artwork. Each year, a portion of these works is exhibited to allow audiences to immerse themselves in the world of imagination and color created by the artists. Then, every Farvardin (March–April), these artworks are presented as gifts to the group's stakeholders — gifts of thought and beauty.

Among these works, a number are selected by Azarestan Group to become a lasting collection, pieces that, over the years, narrate the connection between authenticity, creativity, and a deep respect for art.

AZARESTAN In collaboration with آرت‌یونیتی ARTUNITY

Azarestan Group, as part of its **social responsibility**, is proud to be the official sponsor of the **Iranian National Rowing Team** in international competitions.

At the recent Grand Moscow Regatta, our national team delivered an outstanding performance, earning 9 medals (3 gold, 4 silver, and 2 bronze), adding a new golden chapter to the legacy of Iranian sports.

CSR

I.R.IRAN ROWING FEDERATION

At Azarestan, we believe that supporting talent — especially in less visible arenas — plays a vital role in the growth and progress of society.

• Tohid Girls'High School in Bushehr

• Iranak Children's Museum

Social Responsibility | • Iranak Children's Museum

The Azarestan Group has supported the establishment of the Iranak Children's Museum with the aim of promoting culture and nurturing childhood development, preserving the history and literature of children in society, and fostering constructive connections between children and adults.

The publication of Master Shahriar's poems "Haydar Baba" in 2019, along with its fluent Persian translation, is one of Azarestan's honors to better familiarize Persian speakers with this esteemed work.

Additionally, the publication of a deluxe edition of Master Shahriar's Turkish poetry collection in Nastaliq script in 2023 reflects Azarestan's efforts to preserve the literary and cultural heritage of Iran.
